

Press Release

Takemote Lite & Pro!

Takemote is not only a Remote Desktop Software, it's a remote solution for your software.

Headquarter of APPANDO, April 1, 2016 – APPANDO announces the release of Takemote Lite & Pro software. It enables remote access to multiple applications and remote desktop solution from a tablet, a smartphone or a desktop.

Takemote is based on Wezarp technology and proposes an easy remote solution to control or monitor a software application only or the whole Windows Desktop.

Takemote Lite is a freeware that enables to select an application running on your computer allowing to control or monitor it with a remote device running a Wezarp Client.

Wezarp clients are free of charge and are available for iOS, Android and Windows.

Takemote Pro (99 Euros) provides additional features enabling the selection of more than one application to control or monitor and to run Takemote at Windows startup with preselected applications.

Takemote is available for download on www.wezarp.com.
