WEZARP

Press Release

Wezarp Client for Android is now available!

Wezarp technology is not yet another remote desktop solution, it's dedicated to *YOUR* software!

Austin, Texas, August 3, 2015 – APPANDO, currently exhibiting at NIWeek 2015, is pleased to announce the release of Wezarp Client for Android.

Wezarp technology proposes an easy remote solution with no additional development to control or monitor a software application from a tablet, a smartphone or a desktop. It is multi-client, multi-server and multi-window with no limitation of graphical user interface design.

Wezarp Client for Android now completes the range of our Wezarp client apps by supporting Android devices. This app allows the control of any software application that embeds Wezarp technology.

Wezarp Client for Android is free of charge and available on the Wezarp website: www.wezarp.com and soon on Google play.

About APPANDO
APPANDO is a startup based in Principality of Andorra developing software applications for computers, tablets and smartphones.

About NIWeek 2015
The 21st annual NIWeek conference presented by NI begins August 3 in Austin, Texas, and once again brings together the brightest minds in engineering and science. More than 3,200 innovators representing a wide spectrum of industries, from automotive and telecommunications to robotics and energy, will discover the latest technology to accelerate productivity for software-defined systems in test, measurement, and control.

About Google play
Google Play, originally the Android Market, is a digital distribution platform operated by Google. It serves as the official app store for the Android operating system, allowing users to browse and download applications developed with the Android SDK and published through Google. Google Play also serves as a digital media store, offering music, magazines, books, movies, and television programs.

Other product and company names listed are trademarks or trade names of their respective companies.
